 - (b) a reference in a Tariff Item to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances and a reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance;

- (c) the classification of goods consisting of more than one material or substance shall be according to the provision contained in Paragraph (d);
- (d) where, for any reason, goods are, prima facie, classifiable under two or more Tariff Items, classification shall be effected as follows:–
 - (i) the Tariff Item which provides the most specific description shall be referred to other Tariff Items providing a more general description, but, where two or more Tariff Items each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the goods in a set put up for retail sale, those Tariff Items are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods;
 - (ii) mixtures, composite goods consisting of different materials or made up of different components, and goods put in sets for retail sale, which cannot be classified by reference to Subparagraph (i), shall be classified as if they consisted of the material or component which gives them their essential character, in so far as this criterion is applicable;
 - (iii) when goods cannot be classified by reference to Subparagraphs (i) or (ii), they shall be classified under the Tariff Item which occurs last in numerical order among those which equally merit consideration;
- (e) goods which cannot be classified in accordance with Paragraphs (a) to (d) inclusive shall be classified under the Tariff Item appropriate to the goods to which they are most akin;

 - (ii) subject to the provisions of Subparagraph (i), packing materials and packing containers imported with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods, but this provision does not apply when such packing materials or packing containers are clearly suitable for repetitive use, and the containers which are used by shipping companies for the carriage of cargo in accordance with the “CONTAINERS CONVENTION” shall not be considered as part of the goods;
- (g) the classification of imported goods referred to in the Tariff Items shall be determined according to the terms of those Tariff Items and any related Section or
